

Candidate sites at 1:6,000. Inset: setting at 1:300,000 (basemap © Google); red box = figure extent. Post-event imagery: Planet Pelican, 0.62 m GSD, 2026-06-26 © 2026 Planet Labs PBC.

Site	Perishability estimate	Extent estimate	Coordinates (WGS84)	Approx. dist. to road (m)	Notes
26	low	medium	10.523204°N, 66.966552°W	70	
97	high	medium	10.525736°N, 66.968832°W	0	reactivation
98	med	small	10.524560°N, 66.964434°W	10	
99	med	small	10.524087°N, 66.963268°W	20	
100	med	medium	10.523321°N, 66.964114°W	50	
101	med	small	10.524195°N, 66.962150°W	10	
102	med	medium	10.523835°N, 66.961844°W	20	

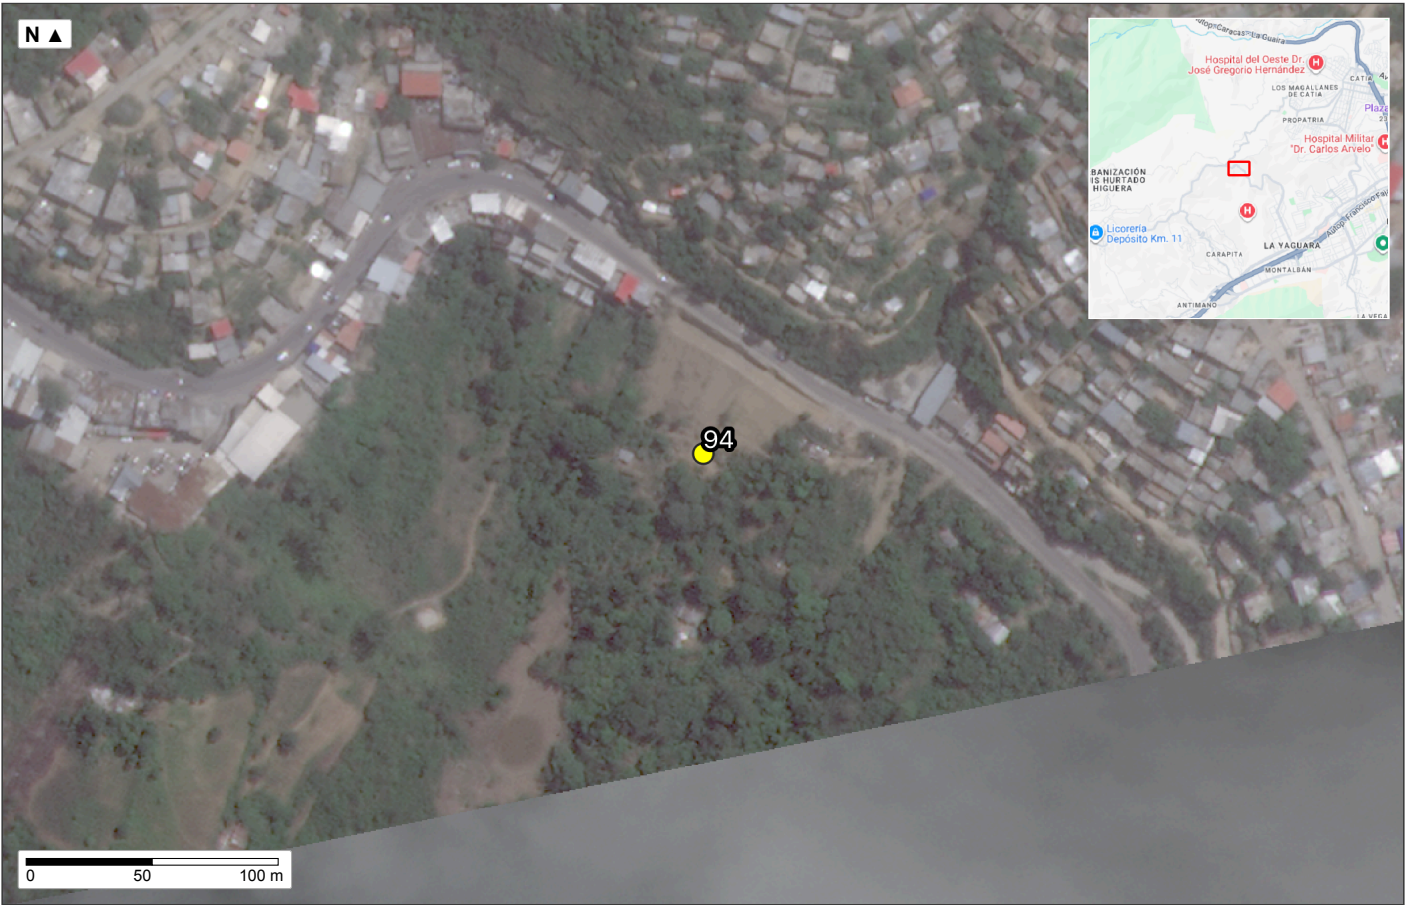

- Perishability estimate indicates priority for documenting evidence before it degrades or is removed.
- Approx. dist. to road: straight-line distance to nearest drivable road in open street map.
- All sites flagged from available pre- and post-event satellite imagery; field verification required.

Candidate site at 1:2,000. Inset: setting at 1:100,000 (basemap © Google); red box = figure extent. Post-event imagery: Planet Pelican, 0.62 m GSD, 2026-06-26; corner gap filled with Planet SkySat, 0.67 m, 2026-06-27 © 2026 Planet Labs PBC.

Site	Perishability estimate	Extent estimate	Coordinates (WGS84)	Approx. dist. to road (m)	Notes
94	high	medium	10.494426°N, 66.973014°W	50	

- Perishability estimate indicates priority for documenting evidence before it degrades or is removed.
- Approx. dist. to road: straight-line distance to nearest drivable road in open street map.
- All sites flagged from available pre- and post-event satellite imagery; field verification required.

Candidate site at 1:3,000. Inset: setting at 1:150,000 (basemap © Google); red box = figure extent. ALTERNATIVE B — 1:3000. Post-event imagery: Planet Pelican, 0.62 m GSD, 2026-06-26; corner gap filled with Planet SkySat, 0.67 m, 2026-06-27 © 2026 Planet Labs PBC.
